Enugu, Nigeria

Summary

Frontend Developer and Machine Learning enthusiast skilled in React, Tailwind CSS, JavaScript, and API integration, with foundational knowledge of Python and ML concepts. Experienced in building responsive web applications and working with data-driven projects. Passionate about combining frontend development with machine learning to build intelligent, user-focused applications. Strong understanding of component-based architecture, UI design, and basic machine learning workflows including data preprocessing and model training.

Education

Computer Science

University of Nigeria Nsukka • Enugu, Nigeria

09/2027

Skills

JavaScript, React.js, Tailwind CSS, Responsive Web Design, Python, Machine Learning, Scikit-learn, Data preprocessing, Supervised Learning, Unsupervised Learning, API integration

Experience

Machine Learning Engineer Intern

CodeAlpha

08/2025 - 01/2026

- Completed hands-on training in machine learning using Python, Pandas, and Scikit-learn
- Built basic ML models for classification and prediction tasks
- Performed data cleaning, preprocessing, and analysis on datasets
- Evaluated model performance using standard metrics
- Worked on practical projects to understand real-world ML applications

Web Development Intern

VTech ICT • Enugu, Nigeria

12/2024 - 01/2025

- Completed structured training in frontend development covering React, Tailwind CSS, and API integration
- Built small to medium web applications as part of practical learning exercises
- Developed responsive user interfaces using modern frontend practices
- Worked on integrating APIs to display dynamic data in projects
- Improved understanding of component-based architecture and reusable UI design
- Practiced debugging and problem-solving through guided projects
